Summary

Electronics and Communication Engineering graduate with experience in low-level programming, networking, IOT and embedded systems. I have a genuine passion for computer networks and how the internet actually works. I find myself constantly curious about the underlying protocols and mechanisms that make communication possible, and have explored and implemented networking concepts across several of my projects. As an Executive Member of WRC Robotics Club, I took ownership of the club website, managing and keeping it up to date. I enjoy digging into how things work. I love to explore networking and document it.

Work Experience

Yarsa Tech Pvt. Ltd.

Pokhara, Nepal

ELECTRONICS ENGINEER INTERN

Sep. 2024 - Dec. 2024

- Gained hands-on experience in embedded systems and firmware development.
- Designed and implemented IoT solutions and RTOS in industry-standard projects.
- Developed and tested firmware for various devices, including a mini Audio QR device.
- Built and configured camera testing devices for embedded applications.
- Worked on professional embedded practices and marketplace applications.

Robotics Club, WRC

Pokhara, Nepal

EXECUTIVE MEMBER

April. 2022 - April. 2026

- Managed and administered the club's website, handling content updates, maintenance, and ensuring consistent online presence.
- Learned to properly deliver knowledge by teaching junior about robotics.
- Worked on projects like Micromouse, Quadraped Bot, Computer Vision
- Designed and implemented an automation system for the competition arena

Freelancing (Upwork)

FREELANCER (EMBEDDED LINUX)

Aug. 2025 - present

- Completed a freelance embedded Linux project on Upwork, researching the Odroid board for GPIO control, learning embedded Linux workflows, and setting up QEMU for emulation and testing.

Skills

Technical Skills C/C++, Python, Linux, PCB designing, freecad, PlatformIO, Microcontroller, Bash, Wire-Shark, Packet Tracer, Docker, Web-development, IoT, ROS2

Art Technology Adobe Photoshop, Adobe After Effects, Illustrator, Figma

Interests Low level programming, Networking, Robotics, Embedded Systems

Honors & Awards

INTERNATIONAL

2020 **Participant**, Japan Super Science Fair (Research Project: Adaptation of Agriculture with Climate)

Japan, Kyoto

2025 **5th Place**, IIT TechFest, Meshmerize Final

Mumbai, India

DOMESTIC

2022 **Finalist**, Battle for Speed, Robotics club WRC

Pokhara, Nepal

2023 **Winner**, Battle for Speed, Robotics club WRC

Pokhara, Nepal

2023 **Participant**, LOCUS (Presented Robotics Arm for project demonstration)

Pulchowk, Lalitpur

2024 **Winner**, LOCUS-ROBO-line Dash (line following micromouse)

Pulchowk, Lalitpur

2024 **Winner**, PCB-Prodigy organized by COTS (Paschimanchal Campus)

Pokhara, Nepal

Writing

Entire journey of your message in nutshell
